## PREVENTATIVE MAINTENANCE TIPS FOR ROLL-UP DOORS

PRACTICAL TIPS TO PROLONG THE LIFE OF YOUR DOORS & AVOID REPAIR COSTS

Roll-Up Doors are constantly exposed to wear and tear, making regular preventive maintenance important for decreasing expensive downtime and reducing repair expenses over the long haul.

- ✓ **Lubricate Rollers & Hinges Monthly** - Use a high-quality lubricant to keep the rollers running smoothly along the tracks
- ✓ **Keep it Clean!** - A clean door helps prevent corrosion and keeps debris from getting in the track so components continue to operate properly
- ✓ **Inspect Cables, Latches, and Other Moving Parts Monthly** - Checking on these components regularly ensures you catch potential issues before they become a real problem
- ✓ **Practice Proper Operation** - Avoid using excessive force when opening and closing the door, never drive with the door in the UP position, and properly secure your cargo to prevent it from slamming into the door

Our Fleet Engineers Division has you covered with an extensive line of roll-up and swing door hardware & replacement parts for those unavoidable repairs.

**NEW POSTER:** Roll-Up & Swing Door Hardware Poster. Order them for free, online today!

## GET READY FOR COLD WEATHER! STOCK UP NOW ON THESE WINTER MUST-HAVES

It's important to have trust in the condition of critical components such as wiper blades and air lines before harsh winter weather sets in.

**MAXXVALUE™**  
**COILED AIR**  
HIGH QUALITY ASSEMBLIES  
AT A LOW PRICE!

MAXXValue coiled air is the industry's first low-cost coiled air that's **assembled in the USA** and DOT tested & approved. Plus, they'll stand up to severe -40° temps all season long.

## MICHELIN CYCLONE™ WIPERS

The Cyclone™ Hybrid Blade from Michelin combines the windshield hugging features of a conventional spring loaded blade with the **anti-snow buildup features** of a beam blade for superior, streak and noise-free wiping in rain, ice, and snow.  
Available in lengths from 16-28".

# DEFEND YOUR AIR SYSTEM

INTEGRATED FILTER  
GLADHANDS FOR  
SUPERIOR AIR  
LINE PROTECTION

## BLOCKS DAMAGING CONTAMINANTS

The Built-In Line Filter is  
Simple to Service.

Plus, a Color-Coded Swivel  
Cover Protects the Seal.

## RESISTS CORROSION

Featuring an Anodized Body  
with Stainless Steel Clamp  
and Wear Plate to Stand Up  
to Harsh Salt Spray.
