## PRODUCT ANNOUNCEMENTS FOR SAVE-A-LOAD® CARGO BARS

Save-A-Load Hydraulic Cargo Bars are the easy, safe, and secure way to protect your freight.

The integrated hydraulic pump maintains a constant pressure to keep your cargo in place without falling or damaging trailer walls. When you're ready to unload, the bar releases with the simple push of a button!

Made in the USA, Save-A-Load cargo bars are also available with hoops to increase their footprint and make securing freight even easier.

### ◆ NOW AVAILABLE FOR DISTRIBUTION

Save-A-Load is now available to our expansive network of distributors and online retailers. Contact customer service today to find out how you can add Save-A-Load products to your store's inventory!

### 🎥 NEW OVERVIEW VIDEO!

Now you can see just how these cargo bars stand up to the competition. Visit [fleetengineers.com/salbars](http://fleetengineers.com/salbars) to check it out!

## 🎗️ DOUBLE THE DONATION THIS OCTOBER

We're proud to make regular donations to [Breastcancer.org](http://Breastcancer.org) with each sale of our **pink Save-A-Load bars**.

During Breast Cancer Awareness Month, we **double** our donation! Order this October and help make a difference!

## PRODUCT UPDATE: TRAILER TIRE CARRIERS

We are pleased to announce a new and improved coating solution for our trailer tire carriers.

- 💧 Provides superior corrosion protection:  
Performs 200% longer in salt spray testing
- 🛡️ This new coating stands up to damage caused by harsh road conditions. Self-healing properties seal exposed surfaces caused by scratches and dings
- 🌱 Plus, it's environmentally friendly!

Aside from the slightly different color of this new coating, our high quality, U.S. made trailer tire carriers will not otherwise change. Please contact your sales rep or customer service for more information.

## DON'T LET WINTER GET THE BEST OF YOU!

Fall is the best time to prepare for the cold winter ahead. Stock up on these great Tramec Sloan products & help get drivers safely through the season

### ✳️ Air & Electrical Lines

Tramec Sloan's high quality, U.S. made coiled air, rubber hoses, and electrical cables are rated for low temperatures and stay flexible all season long.

### ✳️ Anodized Gladhand & Valves

Corrosion is a year round concern, but especially in the winter when de-icing chemicals are actively being used. Go for gladhands and valves that have the superior protection of anodized bodies.

### ✳️ Wiper Blades

A fresh set of wipers keeps a driver's view of the road clear. Try heavy duty blades designed for the extreme conditions of winter.

### ✳️ Gladhand Seals

New seals are recommended every 6 months to ensure a tight connection. Use polyurethane seals that won't crack in the cold like rubber does.
