## UNITIZED WHEEL BEARING NUT SYSTEM

Locking clip detail of Drive Axle Nut #MF111062

Locking clip detail of Trailer Axle Nut #MF111077

The Tramec Sloan line now includes the industry's best spindle nuts, the original Axilok® by Metform, a division of MacLean-Fogg Component Solutions. Installation should take less than half the time required for the old style, 3-piece systems. Still greater time savings are realized with Axilok® when adjustments are needed.

### AXILOK® FEATURES & BENEFITS

- Eliminates the traditional three or four-piece nut system.
- Easily adjustable, one-piece assembly for increased speed, accuracy, and repeatability.
- Unitized part consisting of nut body (2), two locking clips (4), and a retainer cage (5).
- Uses locking clips to maintain joint security and ensure proper end-play.
- Axilok® size (3) and socket size (1) markings
- Significantly reduces the time required for wheel bearing adjustment.
- Delivers accurate results in the process.
- Installs with standard, six-sided socket.
- Saves installation time.
- High degree of accuracy.
- Results in longer bearing, wheel, and tire life.
