431410-100	100 Unpackaged 1/2" NPTF Brass Quick-Fix Assemblies

1/2" QUICK-FIX® KITS

1/2" QUICK-FIX® INSTALLATION INSTRUCTIONS

STEP ONE

Trim the damaged hose end square and push the brass sleeve onto the hose until flush.

STEP TWO

Place the greased barb into the sleeve, pushing and turning it to start the threads.

STEP THREE

Holding the sleeve in place (a wrench may be necessary here), align the barb and swivel hexes.

STEP FOUR

Continue to hold the sleeve and place a 7/8" deep well socket over the swivel hex and onto the barb hex. Screw the barb hex in using a socket (or crescent) wrench.

DONE!

Once the barb is flush to the top of the sleeve, your new hose end is complete and ready for installation.
